

Project and test management for the implementation of a consumer loan

Company	Realisation - approach	Result
Fintech with bank license	<ul style="list-style-type: none">• Project and test management in accordance with the "MVP"- Most Viable Product as stipulated at the begin of the project.• Coordination of the development and implementation activities on both the technical and business side• Alignment with external system providers, e.g. core banking system, interface for proof of identification, credit assessment applications• Coordination of the test activities, including drawing up a test plan, defining test cases for the defined test phases within a very tight time schedule• Completion of status reports for the senior management and executive board• Moderating the status meetings and workshops	<ul style="list-style-type: none">• Go-live for the customer loan within two months of the conception phase• Alignment and completion of a comprehensive list of test cases and open issues to be completed for the planned further development of the consumer loan product
Initial situation		
<p>The Fintech bank was founded by an Fintech company and was granted a German banking licence in 2016. The aim of the Fintech bank is to provide specific banking services as separate products to Fintech and online companies as well as to individual customers.</p>		
Task		
<p>The objective was to go live with a consumer loan product within 2 months. In the initial phase this consumer loan was launched in a joint venture with Scout 24 on the Auto Scout website.</p>
